Skills

Python

Django

HTML, CSS, JavaScript

ReactJS

Version Control (e.g., Git)

RESTful APIs

MySQL, MongoDB

Web Scrapping

Hardworking and passionate job seeker with strong organizational skills eager to secure web developer position. Ready to help team achieve company goals. Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals. Motivated to learn, grow and excel in web development.

Projects

Ecommerce App

Python, Django

The website displays products. Users can add and remove products from their shopping cart while specifying the quantity of each item. They can then enter their address and select Stripe to handle the payment.

Music Streaming App

Python, Django

Music streaming app is a powerful music streaming software that allows users to log into the system, add albums and add tracks to the playlist. All songs listened to by other users registered in the system can also be found in the album.

Social Network App

Python, Django

Social network application is a platform where people can communicate with each other, make friends and express their opinions through text, images, etc. We must also think about the security and privacy of users' data since they use this application to have private conversations.

Real Estate Management System

Python, Django

The main goal of the proposed system is to increase the speed and accuracy of work and minimize wasted time. Simplify the creation of reports according to specifications. Provide users with an easy-to-use system. It is possible to update the relevant files. Provide accurate and timely information request. Asset management and optimal use. It's also menu-driven, making it easy to

use and understand.

Fully Responsive Website

React

Built a fully responsive website using react with multiple pages. The website will have various animations and support mobile, desktop, and tablet screen sizes.

Contact List

React

Built a contact list app that fetches the list of all users from API and renders each user's details on a component with "show age" button which displays the age on click.

Notes App

React

Built a notes app where users can enter text to each note and save it in local storage, delete an existing note, dynamically search among the notes and add character limit.

Quiz App

React

Built a simple React quiz app where users can click on option buttons to answer questions, next question rendered each time option is selected and at the end, the final score is displayed.

Todo List

React

Built a simple to-do app where users can add different types of notes. In addition, users can approve or delete notes from the list.
